

ISELED ADK EXTENSION Dominant

ISELED_ADK_EXT_D

FEATURES

- Digital controllable RGB LEDs
 - Calibrated to D65 white point
 - 24 bit color space
- Complete ecosystem, designed for automotive
- Temperature compensation for red LED
- 488Hz PWM frequency
- Daisy chain support
- LED bar with 16 Dominant LEDs
- ISELED communication protocol
 - Addressing of up to 4079 LEDs
 - Half-duplex, bi-directional 2Mbit/s communication
 - Low latencies
 - Differential communication in the chain
 - Single ended communication between host and first LED
 - Diagnostic support
 - Optional CRC data protection

SET CONTENT

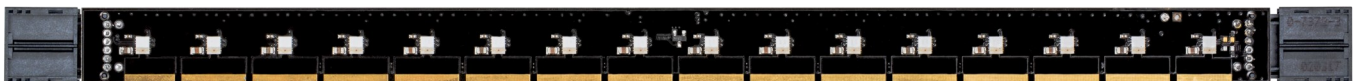

- Dominant LED bar with 16 LEDs
- Board connection cable
